Professional Summary

AI & Data Science student with hands-on experience building production-grade ML systems, including RAG chatbots, voice AI agents, and computer vision pipelines. Strong foundation in machine learning, NLP, and full-stack development, with a focus on deploying real-world AI products. Actively seeking AI/ML internship or research opportunities.

Work Experience

AI Intern, Stark Digital Media Services

06/2025 – 07/2025

Pune

- Built a GST Invoice Concierge Chatbot to resolve user tax queries, improving information access across the platform
- Engineered a real-time AI Voice Agent using speech recognition and NLP for hands-free interaction
- Architected an enterprise-grade RAG chatbot platform using Pinecone for secure, scalable document retrieval
- Developed an AI-powered document verification system leveraging machine learning and computer vision to automate validation, ensuring consistent accuracy across diverse documents
- Integrated machine learning models into REST APIs, executing full model deployment and comprehensive API integration testing in a production-like environment to guarantee reliable service delivery
- Optimized inference pipelines and validated model outputs for accuracy, latency, and reliability

Education

Integrated Btech In CSE- Artificial Intelligence and Data Science,

06/2023 – Present

MIT World Peace University

Skills

Programming Languages

Python, Swift, C, C++, JavaScript, HTML, CSS

Frameworks & Tools

TensorFlow, Scikit-Learn, Pandas, NumPy, Matplotlib, Seaborn

Soft Skills

Problem Solving, Technical Communication, Team Collaboration

AI & Machine Learning

Machine Learning, Deep Learning, Neural Networks, NLP, Computer Vision, Model Training & Evaluation

Backend & Systems

FastAPI, REST APIs, Vector Databases (Pinecone), RAG Pipelines

Projects

ML-Based Health & Environment Analytics

- Built ML models to analyze environmental and health datasets for decision support
- Applied anomaly detection and pattern recognition on real-world data
- Focused on interpretability and real-world deployment
- Tech: Python, Machine Learning, Data Analysis

RoadRupture – iOS Application

- Developed a native iOS app to detect and report road damage
- Designed end-to-end product flow from data capture to visualization
- Integrated backend services with a clean, user-focused UI
- Tech: Swift, iOS Development, Backend Integration

BluCarbon - Blue Carbon Credit Platform

- Built a full-stack platform for issuing and tracking blue carbon credits
- Implemented MRV workflows, automated reporting, and audit trails
- Developed scalable frontend and backend architecture
- Tech: React.js, Tailwind CSS, Python, FastAPI

Certifications

- | | | |
|---|--|--|
| • Intensive Agentic AI Program -
Kaggle × Google, Kaggle | • Introduction to Computer
Science – Harvard CS50 | • Deep Learning & Data Science –
MIT WPU Workshops, MIT WPU |
|---|--|--|
